

X-Ray Stand

These x-ray stands are designed for the new generation portable x-ray units such as the Minxray HF 80.

Manufactured to provide precise 3 axis placement of camera. Sturdily constructed but easily positioned, the x-ray stand makes the job of optimally positioning the camera a simple one.

It is completely manufactured of stainless steel, and features:

- Wind up height adjustment, from floor level, to give a focal length of 750 mm + above a 900mm high table
- An adjustable length control arm to which the x-ray unit is attached
- A positive locking system to ensure that the height adjusted to is maintained
- A simple attachment system, allowing the x-ray machine to be mounted or demounted in 30 seconds with the turn of one hand wheel
- Australian OH&S compliant
- Lockable castors for easy locking and stability once manoeuvred into position
- 3 axial camera placement
- Standard DX Camera mount point

Dimensions:

Height: 1.85m

Total Weight (without camera): 4.5kg

Base: 0.75m²
